xBullRadar

The AI-Native Bloomberg Terminal

for the Next Generation of Investors

Multi-signal analytics · AI voice co-pilot · Tokenized trading

THE PROBLEM

Bloomberg costs $24,000/year. It was built in the 1980s.

$24,000/yr per seat

Institutional pricing excludes retail investors, RIAs, and mid-market funds. Most users only need a fraction of Bloomberg's features.

AI bolted on, not built in

Bloomberg's GPT wrapper is a 2024 add-on to 1980s architecture. It cannot reason about your portfolio or execute trades by voice.

30,000 keyboard shortcuts

Months of training required. The interface is designed for dedicated hardware, not for modern web users who expect instant value.

THE SOLUTION

xBullRadar: Bloomberg if you built it today with AI at the core.

- 4-signal intelligence per stock: sentiment, technical, fundamental & equity risk premium
- Voice co-pilot that thinks like Buffett, Lynch or ARK — and executes trades on your behalf
- Tokenized trading via Ondo Finance — 263 US stocks as on-chain assets, accessible to retail
- Real-time X social sentiment via Grok x_search — what Bloomberg News can't provide

~$100/mo to run vs $2,000/mo Bloomberg

PRODUCT

Everything shipped in Trial v1

4 Signals Per Stock

Sentiment · Technical
Fundamental · ERP

Voice AI Co-Pilot

Buffett · Lynch · ARK
Quant personas

Tokenized Trading

263 tickers via
Ondo Finance

Real-Time Sentiment

X social scoring
via Grok x_search

Portfolio Tracking

COMPETITIVE ADVANTAGE

Bloomberg vs xBullRadar

Dimension	Bloomberg Terminal	xBullRadar
Price	$24,000/yr per seat	~$100/mo infrastructure
AI Integration	GPT wrapper (2024 add-on)	AI-native: voice + portfolio reasoning + trade execution
Social Sentiment	News wire only	Real-time X scoring via Grok
Voice Interface	None	Built-in: ask, analyze, execute hands-free
Time to Value	Weeks of training	Signals live in minutes

MARKET OPPORTUNITY

A $10B+ market ripe for disruption

350,000+

Bloomberg Terminal users globally

@ $24,000/yr = $8.4B ARR

$15B

Global financial data market (2025)

Growing 12% YoY

100M+

Retail & semi-pro investors

Underserved by current tools

Target Segments

- Retail & semi-pro investors priced out of Bloomberg
- Registered Investment Advisors (RIAs) managing client books
- Family offices, prop desks, and emerging quant funds

BUSINESS MODEL

Multiple revenue streams from day one

Free	Pro	Team	Enterprise
$0/mo	$25/mo	$50/seat	Custom
5 tickers max	Unlimited tickers	Shared portfolios	White-label license
Text AI only	Voice AI co-pilot	API access	On-prem deployment
Delayed signals	Real-time signals	Custom alerts	Bloomberg replacement
Basic portfolio	Ondo trading	Priority support	SLA guarantee

Additional revenue: Ondo trading commissions · White-label licensing · Institutional data feed (alt-data product)

TECHNOLOGY

Built to scale — AI-native from the ground up

Tech Stack

Framework:	Next.js 15 · React 19 · TypeScript 5.7
AI / LLM:	xAI Grok (Responses + Realtime WebRTC)
Data:	Polygon · FMP · Twelve Data
Database:	Upstash Redis (edge REST)
Trading:	Ondo Finance (263 tokenized US stocks)
Hosting:	Vercel Edge · Cloudflare Workers
Codebase:	~11,800 lines TypeScript across 22 libs

Unit Economics

- Infrastructure today: ~$100-155/mo
- Per-user cost at 100 users: ~$4-7/mo
- Per-user cost at 1,000 users: ~$1-2/mo
- Bloomberg equivalent infra: ~$2,000/mo

Defensible Moats

- Proprietary signal aggregation engine
- Investment-school voice persona framework
- Two-stage AI trade execution pattern
- Ondo Finance integration (early partner)
- Grok x_search sentiment advantage

ROADMAP

From Trial v1 to Bloomberg Replacement

Phase 1

Now — April 2026

- 4-signal analytics
- Voice AI co-pilot
- Ondo trading
- X Breaking News

Phase 2

May — June 2026

- Stock screener
- Portfolio analytics
- Economic calendar
- Watchlist alerts

Phase 3

July — Aug 2026

- International stocks
- Options chain
- Fixed income
- Forex analytics

Phase 4

Q4 2026

- Brokerage import
- Custom dashboards
- Auto-rebalancer
- API access

TRACTION

Shipped, tested, and live with trial users

~11,800

Lines of TypeScript

22 lib modules · 20 React components · 17 API routes

$100/mo

Infrastructure Cost

vs $2,000/mo Bloomberg-equivalent infrastructure

THE ASK

What we're looking for

Investment / Partnership

Seed funding

To accelerate Phase 2-3 features: stock screener, options, brokerage import, and international coverage.

Distribution partners

RIA platforms, neobanks, or trading apps looking to add AI-native analytics without building from scratch.

Data partnerships

Institutional data vendors, exchanges, or alt-data providers aligned with the x_search sentiment angle.

What We Offer Partners

- White-label signal engine (plug into your app)
- Revenue share on Ondo trading activity
- Co-branded enterprise terminal deployment
- Early partner pricing locked in for 3 years
- Co-development on roadmap feature priorities
- Aggregated X sentiment data feed for quant use

xBullRadar

The AI-Native Bloomberg Terminal

Let's build the smarter analyst together.
